OEKO-TEX® STANDARD 100

OEKO-TEX® STANDARD 100 is the testing and certification system for textiles, ensuring that every product with that certificate has been tested for over 1.000 harmful substances. Products with this label meet international regulations and standards, with more stringent tests for items with extensive skin contact. OEKO-TEX® reviews its safety criteria annually to maintain the highest level of protection.

MADE IN EUROPE

By choosing products MADE IN EUROPE, we're actively reducing our carbon footprint. Shorter distance travelled means less CO2 emissions, conserving resources, and protecting our planet.

TESTED AND CERTIFIED

Promotional items are subject to strict European regulations. All products shown in this catalogue have been put through their paces. Consistent controls and constant improvements form the basis of product safety and guarantee the best possible quality. Certificates recognised all over Europe (RoHS, EN 71, etc.) will put your mind at ease. The DEKRA seal stands for security that you can trust. Additionally, we adhere to the UN Global Compact, BSCI (Business Social Compliance Initiative), and REACH standards. These frameworks ensure our products meet the highest environmental, social, and chemical safety requirements. Feel free to ask us about desired certificates.

CONSCIOUS CHOICE FOR OURSELVES AND THE PLANET

CORK – a warm material with a natural texture and look. After harvesting, cork trees remain alive and can regenerate their bark. Also, waste from cork production is used to produce further items or for upcycling.

BAMBOO – a durable material with a natural look and feel. It's one of the fastest-growing plants on Earth. Grows back after being cut down and is a persistent plant that requires little chemical protection.

WOOD – an easily accessible local material, which reduces the carbon footprint. Best if harvested responsibly, from legal sources, and combined with reforestation.

STAINLESS STEEL – one of the most recycled materials. Steel recycling is effective and allows for repeated processing without losing the properties of the material. Safe for food storage and resistant to corrosion.

GLASS – frequently recycled material. Glass recycling is efficient and allows multiple processing cycles without losing the properties of the material. It doesn't release harmful substances and is safe for food storage.

RPET – made from PET plastic bottles, which reduce waste and the need for petrochemical materials. RPET production usually requires less energy than that of PET. Retains the basic plastic features of durability and flexibility.

COTTON – a natural, multifunctional material. It is biodegradable, which minimises waste. Depending on the type, it can be grown with minimal use of chemicals (e.g. organic cotton).

JUTE – a natural fibre extracted from the jute plant, which grows relatively fast and does not require much chemical treatment. Compared to other crops, it has a lower water demand. It decomposes naturally and is durable.

RECYCLED PAPER – it reduces the need to cut down trees and the production requires less water compared to regular paper. It can be recycled again, which promotes a closed material cycle.

THE IMPORTANCE OF SUSTAINABILITY

Caring for the environment is a collective responsibility that involves both companies and consumers. By choosing environmentally-friendly products and adopting sustainable practices, consumers play an important role in protecting our planet. Our company is committed to supporting these efforts by using environmentally-friendly materials, optimising packaging, and using energy from renewable sources in our processes. Furthermore, we aim to implement sustainable methods along the whole supply chain. Together, we create a synergy that promotes responsible consumption.

Our commitment to sustainability has been recognised in a ranking that evaluates companies on their sustainability efforts. This recognition highlights our ongoing commitment to practices that do our responsibilities justice and contribute to the long-term success of our operations.

SUSTAINABILITY MEETS QUALITY

We believe that high-quality products and sustainability can go hand in hand. Many of our products are made from renewable, recyclable, and environmentally-friendly materials, providing responsible alternatives without compromising functionality or design. Each item is carefully crafted to support sustainable choices.

JOIN US IN FORMING A GREENER FUTURE

Transparency and continuous improvement are at the heart of our sustainability journey. We work towards sustainability in every aspect of our business.

PACKAGING DESIGN – FIRST IMPRESSIONS MATTER

We promote sustainability with our standard packaging made of kraft paper. Using environmentally-friendly materials, we protect our 2.500 products while making a contribution to a greener planet. Together, we can create a world where economics and ecology thrive side by side.

UNIFORM CONCEPT

Our kraft paper packaging is eco-friendly and offers superior durability thanks to its robust, long-lasting material properties. Each product arrives in a clean, streamlined design that highlights essential information such as the product name and colour. Unique selling points are displayed on the back in German and English, supported by intuitive icons that provide immediate insight into the contents.

THOUGHT-OUT UNBOXING

Though not traditional gift wrap, the packaging is attractively designed and ready to be gifted as is. This thought-out design not only captures customer interest but also enhances the unboxing experience, creating memorable moments that elevate your brand's profile.

EYE-CATCHER

With an eye-catching 3D sketch on the front, our packaging attracts attention on store shelves. The stable, stackable boxes ensure that even large quantities can be transported with ease.

RECYCLING AND SUSTAINABILITY

Made with recycled fibres, our packaging minimises paint usage and contains no varnish layers, making it highly recyclable. Once used, the materials can be easily processed for reuse, contributing to a sustainable cycle.

IDENTITY by PRINT

The first impression determines how a brand is remembered – and its identity is what sets it apart. Printing logos, slogans, or graphics is more than just applying colour – it's about creating an experience that builds a connection with the customer.

From the precision of screen printing to the vibrancy of UV printing to the elegance of laser engraving, each technique brings a brand to life in its own unique way. Thanks to these techniques, logos become stories, colours become emotions, and products become memorable touchpoints.

In a crowded market, it's not just about being seen – it's about being remembered. "Identity by print" sums it up: the right print adds meaning, texture, and depth that ordinary products simply can't match.

Whether bold or subtle, every print reflects your brand's character and mission. With our expertise in various printing techniques, we transform everyday items into powerful ambassadors of your brand.

SCREEN PRINTING TECHNIQUE

Classic, cost-effective, and highly versatile – screen printing remains a trusted solution for creating strong, long-lasting designs. Each colour is applied through a fine mesh screen, resulting in sharp, vibrant imprints that hold up beautifully over time. Using the Pantone Solid C palette ensures perfect colour matching and consistent results.

- ✓ Excellent price-performance ratio
- ✓ High durability and resistance
- ✓ Ideal for large surfaces and textiles
- ✓ Perfect for multi-colour logos and designs
- ✓ Best suited for fabrics, umbrellas, bags, or caps, screen printing offers unmatched coverage and visibility. For cylindrical products like bottles, 360° screen printing provides seamless one-colour designs applied with precision as the object rotates.

PRINTING TECHNIQUES

PAD PRINTING

This is an ideal technique for applying precise designs to small or irregular surfaces. Using a flexible silicone pad, ink is transferred directly onto the object, ensuring high durability and accuracy even on uneven surfaces. Applying this technique, we only use the Pantone Solid C colour palette for the best effect. This method is perfect for printing on materials like plastic, glass, metal, and wood.

TRANSFER PRINTING

An excellent technique for achieving high-quality screen prints on various materials. It involves transferring a pre-printed design from a special transfer foil to the desired item using a heat press. Applying this technique, we only use the Pantone Solid C colour palette for the best effect. The result is a sharp, long-lasting print that is perfect for larger production runs.

SCREEN PRINTING

This is an ideal technique for creating vibrant, long-lasting designs on large, flat surfaces. This method involves pushing ink through a specially prepared mesh screen, allowing precise application of each colour to the product. Applying this technique, we only use the Pantone Solid C colour palette for the best effect. It's perfect for multi-colour prints.

LASER ENGRAVING

A sophisticated technique that uses high-precision lasers to create personalised gifts or premium products with a high-quality finish. It's ideal for items like wood, metal, or glass. Even if it uses no colours, the contrast between the engraved design and the base material adds a refined touch.

DIGITAL TRANSFER

This is an advanced technique that delivers high-quality, full-colour designs with exceptional detail and flexibility. It involves printing a digital image onto special transfer foil, which is then heat-pressed onto the fabric. Applying this technique, we exclusively use the CMYK colour palette to achieve the best effect. The result is a soft, photographic-quality print that is vibrant and durable.

DIGITAL PRINTING

A modern technique that delivers vivid, high-quality prints with exceptional durability. Using UV light to cure the ink, we create photorealistic images with vibrant colours on various materials. Using this technique, we exclusively use the CMYK colour palette to achieve the best effect. The process is efficient, allowing for rapid production.

DOMING

A dynamic technique that creates eye-catching stickers by applying a clear resin over a printed logo. This resin not only protects the design but also adds a distinctive, glossy, and tactile finish. Applying this technique, we exclusively use the CMYK colour palette to achieve the best effect. Perfect for promotional items, doming ensures your design remains striking and resilient in various conditions.

EMBROIDERY

A refined technique that uses computer-controlled machines to stitch vibrant, durable designs onto textiles. It uses up to 10 colours in a single design and adds a sophisticated, tactile element to items. Ideal for high-quality branding and customisation, ensuring a professional and long-lasting finish.

REFLECTIVE TRANSFER

A cutting-edge technique that applies a striking, light-reflecting design to various materials using a special foil and heat. It is perfect for adding an eye-catching element to items. The reflective effect is visible beneath any colour and enhances visibility in low-light conditions.

360° DIGITAL PRINTING

An advanced technique that applies full-colour designs around the entire circumference of cylindrical objects using UV-curable inks. Ideal for customising products like cups or bottles. Using this technique, we exclusively use the CMYK colour palette to achieve the best effect. This method delivers vivid, high-gloss colours that are both durable and resistant.

360° LASER ENGRAVING

A versatile technique that applies detailed, permanent designs around the entire surface of cylindrical or curved objects. It uses rotary attachments to achieve precise and elegant engravings on all sides of the product. Ideal for personalising items such as bottles, pens, and glasses.

360° SCREEN PRINTING

An innovative technique designed to utilise the surface area of cylindrical objects in full. This method provides great coverage on round surfaces by applying the print as the object rotates. Applying this technique, we only use the Pantone Solid C colour palette for the best effect. It delivers precise and wear-resistant results in intense colours.

SUBLIMATION

A high-quality solution, perfect for creating vivid, long-lasting designs. It involves heating sublimation inks on transfer paper, which sublimates directly from solid to gas, embedding the ink into the fabric. Applying this technique, we exclusively use the CMYK colour palette to achieve the best effect. The result is a print that becomes part of the material, ensuring durability and a soft finish.

DIGITAL STICKER

A modern technique to create high-quality stickers that are eye-catching. Digital printing on specialised self-adhesive foil ensures vibrant colours and a photorealistic finish. Applying this technique, we exclusively use the CMYK colour palette to achieve the best effect. The process is efficient and allows fast production.

EMBOSSING

This technique is most often used on leather and synthetic leather products. The stamp is used to emboss a logo into the surface of the item by using the appropriate pressure and temperature. It is also possible to produce a coloured embossment by using a suitable foil.
