SMART ELECTRONICS

RETUMBLER® is our strong brand and the heartfelt home of premium drinkware within the promotional products sector. Whether on the go, at the office, or at home, our products offer outstanding opportunities for impactful brand visibility while also convincing with their practical benefits. With a diverse range of designs, materials, and functions, RETUMBLER® covers a wide spectrum of applications. This makes our drinking solutions ideal for various target groups and enables individualized, authentic brand presentations.

re98.

CLASSICS & IDEAS

RE98® combines proven classics with practical everyday helpers. The range offers versatile products that can be used flexibly and provide practical added value in many situations. Familiar shapes are paired with contemporary ideas to ensure broad usability. In this way, RE98® creates a solid foundation for universally applicable advertising messages.

100% PASSION FOR GOOD PRODUCTS

QUALITY IS OUR COMMITMENT.

We stand for branded products that deliver on their promises – and often a little more. Our commitment to quality is built on three strong pillars: sophisticated design expertise, technical precision and responsible, future-oriented manufacturing.

Every product is carefully developed, thoroughly tested and precisely assembled – "Assembled in Germany (Europe)." For us, this designation is not a marketing label but a binding promise: short decision-makingpaths, transparent and controlled processes, and sustainable, reliable value creation.

For us, quality is not just about meeting defined standards, but about continuously optimizing every process. It is not our goal – it is our path. That's why we consistently invest in durable materials and in collaborative partnerships throughout the entire supply chain.

Whether in professional settings, industrial applications or everyday use, our solutions are designed to perform reliably, support processes and deliver long-term value. From the very first use, each product supports our customers with the care and consistency that define true quality.

This is how solutions are created that not only convince through functionality, but also generate efficiency, safety and trust – day after day, for many years to come.

DESIGN BROUGHT TO THE POINT

With a love for form, function, and recognizability.

Design is not a coincidence. It is our attitude. We believe that true design creates recognition, tells stories, and evokes joy at the very first touch. That is why we consciously pursue our own design approach—clear, uncompromising, and defined by a distinctive view of form and function.

Many of our products begin with an idea that gradually evolves into a well-thought-out overall concept. Every line, every detail, and every material is chosen so that form, function, and brand message work together in harmony. This results in promotional products that not only look good, but also endure—in memory, in everyday life, and within the brand image.

Our aspiration does not end with the first draft. Through intensive development phases, models, and testing, each product is refined until it represents exactly what we stand for: clear identity, high usability, and genuine recognizability.

Independent experts also confirm that this approach is more than just a design philosophy. The awards from the juries of the Promotional Gift Awards and the Red Dot Design Award demonstrate that our design mindset has real impact—visible, tangible, and award-winning.

PACKAGING – WITH PURPOSE AND IMPACT

We package with heart and mind. Packaging protects, stages, and tells stories—and that is precisely where its value lies. We follow a clear approach: reduce wherever it makes sense. After all, sustainability often starts with the very first box.

Minimalist design, natural materials, and clean shapes define our claim to modern packaging. They should not only protect but also convey emotion and place every product in the right context. And of course, we know: the most delightful surprises deserve packaging that reflects their value.

That's why our packaging is premium, sustainable, protective—and creates a feeling that lasts long after the moment of opening.

FINISHING – WHERE IDEAS SHINE

We make brands visible and tangible. Every finishing technique helps amplify messages and express identity with precision. From delicate engraving details to full-surface printing in brilliant color quality, we create surfaces that capture attention and stay memorable.

For us, finishing is not the final step—it is the shining conclusion of a story that begins with idea, design, and quality. Every effect, every line, and every shade is chosen with care to not only enhance a product visually, but to give it perceptible depth. This creates individual results that make brands tangible and allow their impact to unfold over time.

Whether minimalist, bold, or emotional—we design finishes to suit the message and emphasize the character of each product. Because true value is revealed not only in form, but above all in the details you can see and feel.

SERVICE – MORE THAN PRODUCTS

SUPPORT THAT GOES FURTHER

We support everyone who works with our products by providing practical solutions that make everyday tasks easier. This includes, above all, our Presentation Creator—a digital tool that enables customized presentations in no time.

Our goal is to make access to our product range as simple, convenient, and transparent as possible. We want to noticeably simplify the selection and decision-making process and help users find the right solutions quickly and intuitively. At the same time, we create opportunities to present products clearly and to share information efficiently.

Because even though good products speak for themselves, we make sure their strengths become visible and their potential is recognized. This creates a level of service that goes far beyond simply supplying goods and delivers real added value across a wide variety of use cases.

COLOUR-CONCEPT

Our configurable products open up endless possibilities for brands that want to stand out.

18 colors

Compatible with many products

Finishing from 1 piece

Individual design with a concept:
With our configurable products, colors, materials, and finishing options can be combined exactly as desired. This results in products that perfectly match the brand identity and the intended style universe.

A unified brand presence made easy:
Whether it's a drinking bottle, cup, lunchbox, or tech gadget – all items can be designed using the same color concept. This creates a clear visual line and makes your assortment unmistakable.

Efficient and flexible:
Thanks to the modular product structure, new items can be added at any time without disrupting the existing design language. Your brand image remains consistent – regardless of product category or quantity.

Whether boldly configured with vibrant colors or subtly elegant—each product speaks your brand's language.
You decide how loud or quiet your brand presence should be: colorful, modern, and attention-grabbing, or minimalist, premium, and understated. With our configurable products, you create promotional items that perfectly match your brand personality—in style, color, and expression.

Office Thermo mug

While the models in red, white and dark blue have a white inner coating, the black mug also has a black interior. Made from recycled stainless steel, the double-walled thermo mug is both robust and durable. The insulation keeps your drinks warm for up to 4 hours or cold for up to 24 hours. The outer powder coating ensures an appealing look and a pleasant feel. A leak-resitsant push-on lid made from PP and AS plastic is optionally available. You can choose the sliding closure in one of 18 colours. The soft base made from TPR plastic provides slip resit'sance and protects both the mug and surface from scratches. For easy care, all components of the item are dishwasher safe.

Thermo mug

- Leakproof
- Dishwasher safe
- Insulation: double walled, with copper-vacuum
- Recycled Stainless Steel
- Micro powder coating

This REFLECTS® in-house design impresses with a modern look, outstanding functionality and comfortable one-handed operation. Whether in the office, at home or in the car – RETUMBLER-Mezzo Click is ideal for various occasions. A single "click" on the lid button is enough to open and close the drinking opening.
Enjoy your favorite drink for hours at the optimal temperature! The double-walled 280 ml mug with copper vacuum insulation keeps the drink warm for up to 4 hours or cool for up to 24 hours. The screw lid with a deeply embedded silicone seal not only supports the insulation performance but also provides excellent leak protection. The high-quality powder coating or anti-fingerprint coating gives the body a pleasant feel while reliably protecting it from fingerprints.
While the mug is made from recycled stainless steel, the lid is made from polypropylene plastic. For thorough cleaning, you can easily disassemble the lid. All components of the item are dishwasher safe.
The thermo mug can be refined with laser engraving, pad printing, or UV printing.

myVivero: the concept on stock

350 ml | 13,4 cm | 5h | 1,5h

ASSEMBLED IN GERMANY

52570 RETUMBLER-myVIVERO

Thermo mug

- Leak-proof
- Double wall
- Dishwasher safe

Our innovative in-house development redefines the principle of the reusable mug for advertising messages. The 350 ml mug consists of three components: The inner mug is made of high-class stainless steel, which can be matched with a white or black lid featuring a uniquely large print area. To round off the concept, there is a choice of twelve outer mug colours - ten transparent and two opaque mug colours.
The outer mug can be used as an additional drinking mug if required. The transparent outer mugs are another highlight of the myVivero, as the inner mug seems to float inside. Advertising on the outer mug gives it a new visual dimension.

Material plastic, silicone, recycled stainless steel
Measurements 148 x 88 x 68 mm
Weight 242 g **Packaging** Polybag

LAS 26 | UVD 3 | TAM 4C

gift box optional

MyVivero has been developed with a tapered design. Its clever shape allows a secure grip at all times – be it in the gym or while dancing at a festival.

The large printable lid made from PP plastic is smoothly adjustable and can be opened wide.

Our favourite cup myVivero is a real talent. The entire cup fits under even the small coffee machines.

52595 RETUMBLER-VIVERO STEEL

Thermo mug

- Recycled Stainless Steel
- Leakproof
- Dishwasher safe
- Insulation: double walled, with copper-vacuum
- Micro powder coating

With RETUMBLER-VIVERO STEEL, a REFLECTS® in-house design, you present a thermo mug with a large filling capacity of 350 ml and outstanding functionality to your customers. The mug – made of recycled stainless steel – is available in three versions: black or white powder coating or silver mirror finish. The powder coating gives the thermo mug a modern, matt look and good scratch resit'sance. The special mirror finish through high gloss polishing forges an absolutely striking look of the mug. The lid is available in black.
The double-walled design and the copper vacuum insulation ensure the excellent insulation performance of the mug. The leak-proof mug keeps drinks warm for 6 hours and cold for 24 hours. Tip: All three variants are dishwasher safe.

52594 RETUMBLER-COLESSO

Thermo mug

- Leakproof
- Dishwasher safe
- Insulation: double walled, with copper-vacuum

The double-walled thermo mug RETUMBLER-COLESSO is characterised by it's large filling capacity of 400ml, excellent insulating performance and attractive design. The thermo mug is an in-house design and is available in black and white. The transparent lid and the elegantly curved shape of the mug form an impressive appearance. The powder coating provides a pleasant feel and protects the surface of the mug from scratches and fingerprints. The screw cap and the silicone seal on the lid ensure that the thermo mug is leak-proof.
Thanks to the double-walled design and the high-quality copper vacuum insulation, the mug keeps drinks hot for 5 hours and cold for 8-10 hours. It can be easily and thoroughly cleaned in the dishwasher.

- Recycled Stainless Steel

The RETUMBLER-myNizza Ceramic office thermo mug holds 350 ml and impresses with its modern design. Thanks to the ceramic inner coating, you can enjoy your favorite beverages without any alteration in taste. The ceramic also offers an attractive look and is very easy to clean. As a special feature, you can order the transparent push-on lid and choose the closure slider from 18 different colours. While the models in red, white and dark blue have a white inner coating, the black mug also has a black interior. Made from recycled stainless steel, the double-walled thermo mug is both robust and durable. The insulation keeps your drinks warm for up to 4 hours or cold for up to 24 hours. The outer powder coating ensures an appealing look and a pleasant feel. A leak-resit'sant push-on lid made from PP and AS plastic is optionally available. You can choose the sliding closure in one of 18 colours. The soft base made from TPR plastic provides slip resit'sance and protects both the mug and surface from scratches.

Sleeve optionally selectable

52652 RETUMBLER-GRAND CANYON

Thermo mug

- Insulation: double walled, with copper-vacuum
- Leak-resit'sant
- Dishwasher safe
- Recycled Stainless Steel

Discover the RETUMBLER-Grand Canyon thermo mug! With an impressive capacity of 1200 ml, it is the ideal companion for long periods of thirst. The powder-coated thermo mug is made from recycled stainless steel, AS and PP plastics. Thanks to the double-walled copper vacuum insulation, the drink stays cold for up to 32 hours or hot for up to 9 hours. The mug is particularly suitable for summer refreshments. Prefer it ice-cold? Thanks to the generous opening, ice cubes can be easily added, which stay frozen for up to 48 hours due to the excellent insulation of the mug.

The leak-proof, multifunctional plug lid has both a closable straw opening and a flip-lid opening. This allows you to conveniently use the mug not only at home or in the office, but also on the go. Tip: The included Tritan straw has a useful stopper at the bottom to prevent slipping out. This way, the straw stays securely in place even with carbonated drinks.
RETUMBER-Grand Canyon provides a prominent logo area on the mug body. Advertising can be done via pad printing, UV printing or laser engraving. All components of this mug can be safely cleaned in the dishwasher.

ASSEMBLED IN GERMANY

52573 RETUMBLER-DRINQEO

Thermo mug

- Insulation: double walled, with copper-vacuum
- Dishwasher safe
- Leakproof
- Changeable rubber bottom
- Recycled Stainless Steel

It's the timeless and classic design that dit'singuishes the RETUM-BLER-myDRINQEO thermo mug from others. The stainless steel mug with anti-fingerprint finish features a practical 360° lid and can be customised with a coloured ring. In addition, the soft base can be chosen from 18 different colours. All configurable components of the Drinqeo family are available from stock in Cologne.
The completely BPA-free mug is double-walled with vacuum copper insulation and has a capacity of 350 ml. Due to a small technical feature integrated into the lid, the thermo mug has a very good insulation performance: it keeps warm for eight hours and cold for 24 hours. The 360° lid can be opened/closed with one hand and allows comfortable drinking without a fixed drinking opening. The soft base ensures a secure stand on all surfaces.

52645 RETUMBLER-PORTMORE

Thermo mug

- Leakproof
- Insulation: double walled, with copper-vacuum
- Changeable rubber bottom
- Dishwasher safe
- Micro powder coating

This thermo mug impresses with its familiar resemblance to our popular thermo mug RETUMBLER-Kingston. The new 400 ml mug not only inherits strong features, but also dit'singuishes itself with unique characterit'sics. A special feature of it is the flip lid, which stands out for its easy operation.
RETUMBLER-Portmore is made of stainless steel, AS and poly-propylene plastic and is available in 4 versions: powder-coated black, white, gray or stainless steel with an anti-fingerprint coating. The black and stainless steel variants are equipped with a black silicone sleeve and a black transparent flip lid. The light gray and white mug models have a dark gray silicone sleeve and a clear flip lid.
The double-wall with copper vacuum insulation ensures im-pressive insulation performance. While warm drinks remain pleasantly warm for up to 5 hours, cold drinks stay refreshing for up to 24 hours. This leak-proof drinking mug allows you to enjoy genuine drinking pleasure anytime, anywhere. A rubberized soft bottom ensures slip resit'sance and protects surfaces from scratches. All components of the insulated mug are dishwasher safe. The rubber bottom can be removed for cleaning.

52560 RETUMBLER-myKINGSTON

Thermo mug

- Dishwasher safe
- Insulation: double walled, with copper-vacuum
- Micro powder coating
- 360° lid

With an individual silicone grip sleeve the high-class myKingston thermo mug can be visually adapted to the customer's corporate design. The double-walled thermo mug with copper vacuum insulation is available in powder coated white, black, light grey or stainless steel anti-finger print. There are 18 different silicone colours to choose from. The thermo mug keeps drinks warm for up to 6h and cold for up to 24h.
Usable from all sides! Exclusive to REFLECTS is the 360-degree drink closure that can be used single-handedly. By simply pressing on the lid, the drinking mechanism is unlocked and closed in the same leak-proof way.
The removable anti-slide base of the mug protects surfaces from possible scratches and gives the mug a secure and stable hold. The lid can be removed for cleaning. All components are dishwasher safe. The individual packaging can be selected as an option.
The 335 ml insulated mug can be customised with pad printing, UV printing or laser engraving. The mug turns into a real eye-catcher with a laser engraving on the click lid made of stainless steel.

52625 RETUMBLER-DUOSHOT

Thermo espresso mug

This REFLECTS® original design comprises two premium black espresso mugs made from recycled stainless steel. Their elegantly contoured shape and the black powder coating perfectly complement the design of our RETUMBLER-Colesso thermo mug – positioning the RETUMBLER-Duoshot as an innovative addition to our COLESSO range. Each double-walled 80ml coffee mugs can comfortably hold two espressos. The dual-layer construction insulates hands from the heat, ensuring a delightful drinking experience. These handy espresso mugs are perfect for daily use and on-the-go moments. A practical note: these thermo mugs can be effortlessly and thoroughly cleaned in the dishwasher.

Material recycled stainless steel **Measurements** 66 x 55 x 55 mm **Weight** 49,2 g **Packaging** gift box

55 ml

52628 RETUMBLER-DUOSHOT GLASS

Thermo espresso mug

This set of two includes double-walled espresso glasses made from boro-silicate glass, each with a capacity of 55 ml. The premium material ensures outstanding heat resit'sance. The practical double-wall design keeps coffee warm for extended periods while simultaneously protecting the hands. Furthermore, the coffee glasses has a unique aesthetic: due to the transparent double-wall, the beverage appears to "float" inside the glass. The effect makes coffee specialties such as Espresso Macchiato or Espresso Marocchino visually fascinating.
Care tip: The espresso glasses can be cleaned in the dishwasher without any residue.

52603 RETUMBLER-ORTADO 500

Thermo Drinking Bottle

500 ml | 18,7 cm | 36h | 7h

- Recycled Stainless Steel
- Leakproof
- Insulation: double walled, with vacuum
- Dishwasher safe
- Suitable for carbonated drinks

The RETUMBLER-ORTADO-500 is a premium thermo bottle crafted from recycled stainless steel and polypropylene plastic. It captivates with its aesthetic design, tactile pleasure, and outstanding quality. Owing to its double-walled vacuum insulation, this drinking bottle offers superb insulation properties: beverages maintain their warmth for up to 7 hours and remain cold for up to 36 hours.
The delicate powder coating gives the bottle an exceptionally pleasing touch. A cork lid, complemented with a practical handle, provides a harmonious appearance. The handle ensures the drinking bottle can be comfortably carried or attached to a bag – making it perfect for on-the-go. The silicone seal and twit's cap ensure the thermo bottle is securely sealed, offering leak-proof protection. This makes the bottle suitable for carbonated drinks. The item can be cleaned in the dishwasher. Please note: The cork lid is not dishwasher-safe!

52604 RETUMBLER-ORTADO 750

Thermo Drinking Bottle

- Recycled Stainless Steel
- Leakproof
- Insulation: double walled, with vacuum
- Dishwasher safe
- Suitable for carbonated drinks

The RETUMBLER-ORTADO-750 is a premium 750 ml thermo bottle crafted from recycled stainless steel and polypropylene plastic. Its striking appearance, pleasing touch, and outstanding quality set it apart. The double-walled vacuum-insulated bottle has excellent thermo characterit'sics, ensuring beverages stay warm for up to 11 hours and cold for up to 41 hours.

The bottle's fine powder coating provides an exceptionally pleasant tactile experience. An elegant cork lid with a metal handle complements the design harmoniously. Due to its silicone seal and screw cap, the bottle is securely sealed and leak-proof, making it suitable for carbonated beverages. The handle allows it to be comfortably carried or attached to a bag. The thermo bottle can be safely cleaned in a dishwasher. Please note: The cork lid is not dishwasher safe.

52724 RETUMBLER-URBIX THERMO

Thermo Drinking Bottle

- Leakproof
- Dishwasher safe
- 2-in-1 Drinking Lid
- Carrying handle
- Insulation: double walled, with vacuum

The RETUMBLER® URBIX THERMO impresses with an innovative 2-in-1 lid for maximum flexibility when drinking. The protected straw opening can be unfolded as a flip lid, while the main lid can be opened with a push function for a "big sip." A separate foldable ring protects against accidental opening and serves as a practical carrying handle, making the bottle the ideal companion for sports, travel, or on the go.
The robust steel bottle with powder coating is available in black, white, and navy blue; the black version delights with its exclusive "All Black Design." With a capacity of 750 ml, double-walled vacuum insulation, and optimal temperature control, the URBIX THERMO keeps drinks warm for up to 6 hours and cold for up to 30 hours.

52624 RETUMBLER-ARCTICDROP

Thermo Drinking Bottle

- Recycled Stainless Steel
- Dishwasher safe
- Leakproof
- Insulation: double walled, with copper-vacuum
- Suitable for carbonated drinks

This sports bottle, crafted from recycled stainless steel, stands out for its appealing design, generous capacity, and impressive insulation performance. The premium bottle is available in a sophit'sicated black or white powder coating. Liquids remain warm for up to 6 hours or 41 hours cold. Owing to the meticulous design incorporating a silicone seal and twit's cap, the bottle is leak-proof and suitable even for carbonated drinks.
The convenient carry loop allows for effortless portability. Its wide opening makes for easy filling, even accommodating ice cubes. Tip: Feel free to place the bottle in the dishwasher for thorough cleaning.

This 650 ml bottle is made from borosilicate glass, recycled stainless steel, and recycled polypropylene plastic. A standout feature of the high-quality, heat-resit'sant borosilicate glass is its handcrafted, mouth-blown craftsmanship. With its matte, translucent finish (resembling frosted glass), the bottle is truly a sight to behold (available for colour models only). This leakproof drinking bottle is suitable for both hot and cold beverages.
The configurable myToulon Glass bottle can be paired with a silicone ring and sleeve, with a choice of 18 different silicone colours.
Care tips: The clear bottle can safely be washed in a dishwasher, the painted models should be hand-washed.

52684 RETUMBLER-CAMAS

Drinking bottle

- Leakproof
- Dishwasher safe
- One-handed operation
- Loop
- Suitable for carbonated drinks

Discover this ultimate drinking bottle for on-the-go, sports, and outdoor activities! Thanks to its slim shape, the 780 ml bottle fits anywhere. Made from high-quality Tritan®, the bottle is particularly robust and lightweight. The matte body in gray or blue gives the bottle a unique look and a comfortable feel. The lid allows for one-handed opening, while the wide mouth provides a comfortable drinking experience. The leak-proof bottle is also suitable for carbonated beverages. The Clou: When the closure button is pressed, the lid lifts slightly to let out carbon dioxide. Only when the button is released does the lid fully open. This way, pressure from carbonated drinks is controlled and reduced. With the attached carrying strap, the bottle is easy to grab and carry. All components are dishwasher safe.

52650 REEVES-CONVERTICS TIE

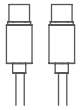

USB-C Cable with Cable Tie

- Fast Charge: up to 60 Watt
- Charge and Data Cable
- Cable length: 1 m
- Recycled PET plastic
- Recycled aluminum

REEVES-Convertics Tie is an exclusive inhouse-design by RE-FLECTS®, combining creative design and outstanding functionality perfectly. The silicone cable tie is available in 6 color variants, from vibrant red and orange to timeless black and white. With the cable tie, the included USB-C to USB-C cable can be conveniently bundled and taken along. During charging, you can fix the 1m long charging cable in the designated slots of the cable holder. This way, you avoid potential loss of the holder.
The charging cable made of recycled PET and TPE plastics offers a power of up to 60 watts. It is ideal for fast charging and data transfer. The textile coating additionally provides a high-quality appearance. The round plate made of recycled aluminum on the cable holder provides the perfect stage for your logo.

6-in-1 Charging Cable incl. Cable Holder

- Fast Charge: up to 60 Watt
- Cable length: 2 m
- Charge and Data Cable
- Recycled TPE plastic
- Recycled PET plastic
- Recycled aluminum

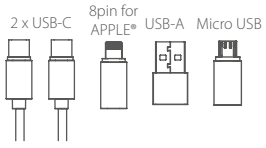

Discover this clever cable holder for the office or home! The REFLECTS® in-house design is available in black or white and keeps your cables secure on your desk. After using your charging cable, simply fix it in the guide of the holder – thanks to the non-slip silicone base, it stays reliably in place. There is also space for storing the USB-C cable.
A stylish 2-meter textile cable is included. The charging and data cable features two USB-C connectors and a USB-A adapter. Additionally, an 8-pin adapter for Apple® and a Micro-USB adapter are conveniently stored within the cable holder. It supports fast charging up to 60 watts. The product comes in a premium 1C gift box.
The round advertising space made from recycled aluminium is perfect for high-quality laser engraving. Alternatively, the item can be refined with pad printing or doming.

6-in-1 Charging Cable

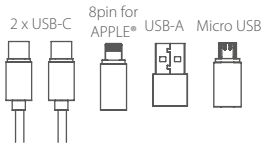

- Fast Charge: up to 100 Watt
- Charge and Data Cable
- Recycled PET plastic
- Recycled TPE plastic
- Cable length: 1,2 m
- 8-Pin for Apple

This 6-in-1 charging and data cable is the perfect solution for various devices, both at home and on the go. The 1.2-meter-long charging cable can simultaneously charge 3 devices with up to 100 watts. Additionally, it supports power delivery, allowing it to quickly charge even notebooks. An LED indicator on the splitter signals the charging status: red for fast charge, green for normal charging speed. The cable is made from aluminium, recycled PET and TPE plastic and features high-quality fabric sheathing.
The 6-in-1 charging cable combines ports for USB-A, USB-C, Micro-USB and 8 Pin for Apple®. Removing the USB-A plug reveals an additional USB-C port.
The cable holder REEVES-Convertics Tie is included - ideal for neatly storing the charging cable. Finishing options include laser engraving, pad printing and doming.

52693REEVES-BEGMELLA 3 Watt

Magnetic Wireless Speaker with Light

- Output: 3 watt
- TWS Function
- LED: Mood light
- Battery (rechargeable): included
- Magnetic attachment
- Including USB-A to USB-C Cable

This black 3-watt wireless speaker combines sound quality with dynamic LED light effects in a compact design. With the TWS function (True Wireless Stereo), two REEVES-Begmella speakers can be paired to create a better sound experience.
A unique feature of this item is that it can also be used as a phone stand. Thanks to its magnetic base ring, the speaker can attach to MagSafe®-compatible devices. For other devices, a metal ring is included, which can be affixed to a phone case, allowing the speaker to function as a magnetic phone stand. The magnetic base isn't just for smartphones – you can also attach the speaker to magnetic surfaces such as noticeboards, fridges, or any other metal surface - wherever you need it!
The speaker is charged via the included USB-C cable. At 50% volume, you can enjoy your favourite music for up to 1.5 hours. The ABS plastic and polycarbonate housing ensures durability, while the silicone base provides a stable grip on surfaces. For added safety, all necessary protective circuits are integrated.

Apple® and MagSafe® are registered trademarks of Apple Inc., registered in the US and other countries.

Wireless Speaker with Light

- Output: 5 watt
- TWS Function
- LED: Mood light
- Battery (rechargeable): included
- Including USB-A to USB-C Cable
- USB-C Connector

Experience a powerful combination of sound and light! The black 5-watt wireless speaker delivers excellent sound quality and is the perfect companion for any party. With an impressive 10 hours of playtime at 50% volume, it is especially ideal for on-the-go use and open-air events. The vibrant, dynamic LED light effects synchronise with the music. Thanks to TWS technology (True Wireless Stereo), two REEVES-Covarny speakers can be paired together to create a spatial sound experience.
The speaker is made from recycled ABS and PC plastic. With its modern, compact design, the item is not only functional, but also eye-catching. A practical silicone loop ensures the speaker can be easily carried or hung up. It charges quickly with the included USB-C cable. You can play media from a USB stick via the USB-A port. All necessary protection circuits are integrated into the product.
Enhance your REEVES-Covarny with your logo using pad printing or UV printing! A 1C gift box completes the item.

Torch

- Lumens: 300
- Recycled aluminum
- LED colour: white
- Rechargeable
- Signal light
- Loop

The rechargeable REEVES-myFlash 300 torch is a more compact version of the powerful REEVES-myFlash 700. Crafted from recycled aluminium, this torch is a REFLECTS® own design for the REEVES® brand. It sports a dark grey anodised finish and can be paired with a grip sleeve. The silicone components are available in a wide range of colours from stock in Cologne. For the first time, a bamboo sleeve option is available. The torch can be ordered without a grip sleeve, but it comes with a wrist strap.
The 300-lumen strong, white LED beam is adjustable, zoomable, and illuminates up to a maximum distance of 132.7 meters. The rubberized button cycles through its 5 distinct lighting functions: high (battery life of 55min), mid (battery life of 1:15h), low (battery life of 2:45h), flashing and emergency modes. The maximum brightness has been determined at 4400 candela.

OCTOPUM

my**FLASH 700-Torch**

Configuration items - from one piece ex-warehouse Cologne

This powerful and rechargeable aluminium torch is an in-house design developed exclusively for the REEVES brand from REFLECTS. The torch is available in silver or black anodised finish, has a black carrying strap and can be combined with a silicone grip sleeve and/or a silicone ring. The silicone components are available in many different colours from Cologne. Of course it is also available without any silicone components.
The torch includes a 700 lumen original Osram P8 LED light (colour white). The light cone is zoomable and has a maximum light range of 376 metres. Five light modes are integrated: high (battery life of 00:45 h), mid (battery life of 01:15 h), low (battery life of 02:30 h), flashing mode and SOS. The maximum brightness is determined to be 35,400 candela.
The high-quality torch can be recharged via a micro-USB connection which is located in the head of the torch. The connection is hidden under the light cone zoom of the torch head and the torch thus IPX4 splash-proof overall. A USB-A to micro USB charging cable is included.

53006 REEVES-CLERDON

Rechargeable Multifunctional Headlamp

- Lumens: 280
- Lumens: 280
- LED colour: red
- LED colour: white
- Magnetic attachment
- Including usb cable

REEVES-CLERDON is a wonderful versatile headlamp with 280 lumens. It features a particularly bright light and a variety of functions. There are two light colours available: white and red. The white light can be dimmed to 100%, 50% and flashing, while the red light can be set to continuous and flashing light. The lamp has a removable light diffuser. The running time of the lamp is up to 16 hours. The soft, elastic and adjustable headband ensures comfortable wearing.
By twisting it gently, the lamp can be separated from the strap and then used separately. It can be held on magnetic surfaces with a built-in magnet or hung on the carabiner. With an integrated clip on the plastic flap, the lamp can also be attached to other materials, e.g. clothing. Thanks to these versatile applications and the different modes, the headlamp functions as a camping light, spotlight, floodlight, emergency beacon and reading lamp - a reliable light source for various occasions and activities. The headlamp can be charged via a USB-C connection. A USB-C charging cable is included in the delivery.
Customers' logos and slogans can be engraved on the body of the lamp by means of a noble laser engraving. All standard protective circuits are integrated.

53009 REEVES-SAPPORO

Rechargeable Multifunctional Headlamp

- Lumens: 450
- LED colour: white
- Magnetic attachment
- LED colour: red
- LED colour: green
- Rechargeable

This rechargeable head and pocket lamp with 450 lumens is a reliable light source for various occasions. Enjoy its versatile applications, as REEVES-Sapporo can be used not only as a headlamp but also as a pocket lamp. As a headlamp, it is perfect for nighttime jogging, tasks in the basement and many other activities. Particularly practical is the ability to adjust the light angle by rotation. This way, you can direct the light, for example, while jogging and illuminate the path. By sliding, the lamp can be detached from the headband and used as a pocket lamp. The magnetic clip allows easy storage and carrying of the lamp.

The head and pocket lamp offers a variety of practical light modes and colors. There is an LED mode and a COB mode to choose from. In the LED mode, the brightness can be dimmed to 100% or 50%, while in the COB mode, options such as High, Medium, and Low can be selected. A zoom function is available in the LED mode. In addition, the COB light has a mode for colored light. The lights have a runtime of up to 2 hours.
This useful all-rounder can be decorated via laser engraving or pad printing. All common protective circuits are integrated into the item.

Weather station

- Thermometer
- Magnetic attachment
- Stand
- Wall holder
- Battery: included

Material plastic **Measurements** 58 x 45 x 18 mm
Weight 36 g **Packaging** gift box

This battery-operated weather station serves both as an indoor thermometer and hygrometer. The thermometer measures temperatures ranging from 0°C to 50°C, while the hygrometer gauges humidity levels from 20-95% RH.
On the easily readable display, the recorded temperature and humidity are complemented with a smiley face. Should the humidity fall below 40% (too dry) or rise above 70% (too moist), the display will show a displeased expression, otherwise a smiling face appears. The temperature reading can be toggled between Fahrenheit and Celsius by pressing the black button on the backside.
The product offers three mounting options: thanks to its fold-out stand, the mini weather station can be placed upright. An incorporated hole on the back allows for convenient wall mounting. With the built-in magnet, the room thermometer can also be affixed to metal surfaces.

600 ml

52679 RE98-myNIZZA

Thermo Lunchpot

- Recycled Stainless Steel
- Leakproof
- Dishwasher safe
- Insulation: double walled, with copper-vacuum
- Micro powder coating

Enjoy your meals or snacks on the go with the RE98-Nizza Lunchpot! Whether at school, work, picnics, or on hikes – the 600 ml Thermo Lunchpot is always by your side. A special highlight: the Lunchpot is customizable – choose your colour combination.
Available in classic black, white, or silver, this exclusive in-house design impresses with its modern aesthetics and excellent quality. Thanks to its double-walled copper vacuum insulation, your food stays warm for up to 7 hours or cold for up to 24 hours. Whether soup, pasta, casseroles, or yogurt, you can enjoy your meals at the perfect temperature anytime. The wide opening makes filling the Thermo Lunchpot effortless, and its leak-proof construction ensures your food stays securely sealed.

Made from recycled stainless steel, the Thermo Lunchpot features a high-quality powder coating in black or white, or an anti-fingerprint coating on the silver model. This gives the product a sleek appearance and a pleasant feel. The silicone vent on the lid, available in 17 colours, allows you to customize the Lunchpot to your design. All parts of the product are dishwashersafe.
The product comes in a 1C gift box. For effective branding, your message can be applied through laser engraving, pad printing, or UV printing.

52581 RE98-LAUDAT

Lunch Kit

- Large containers: 2
- Cutlery set
- Rubber band

Whether for work, school or leisure - lunch boxes are everyday items for many people and have a long service life. Place your advertising message in the everyday life of your customers and make them happy with our all-rounder RE98-Laudat.
The lunch box contains two black 500 ml containers that are separated by a divider. Inside the separator is a black plastic cutlery set consisting of a knife, fork and spoon. To ensure that the cutlery is safely stowed away, the individual pieces of cutlery are clamped in matching holders. A food separator for one of the two boxes is also included.
The lid of the lunch box is made of bamboo and plastic. A special feature: plastic and bamboo can be separated, so all plastic components can easily be put in the dishwasher. The bamboo board can also be used as a cutting board.
For additional stability, the entire box is enclosed in a black rubber band.

52692 RE98-CUTLA
Cutlery set

- Recycled Stainless Steel
- Recycled polycarbonate
- Knife
- Fork
- Spoon

The RE98-CUTLA cutlery set was honoured with the prestigious RED DOT AWARD 2025 in the product design category!
Whether for a picnic, trekking tour, the office, or a construction site – the RE98-Cutla cutlery set is ideal for on-the-go use. The cutlery is made from high-quality recycled stainless steel and comes packaged in a hygienically sealable, modern box made from recycled plastic.
The knife, fork and spoon are cleverly stacked on top of each other and safely transported in the closable box. The design of the cutlery pieces makes intuitive stacking easy. Made from highly polished, durable stainless steel, the set stands out for its longevity. The serrated knife offers the same sharpness as traditional household knives, while the four-pronged fork is perfect for picking up food. The size of the cutlery is between standard main course and dessert cutlery, making the set suitable for any meal or snack.
After use, the cutlery can be stored in the handy box, which is available in black, dark blue, red, or white. The transparent polycarbonate cap can be easily opened and removed with a light press on the back. Additionally, the box functions as a knife rest, keeping the cutlery hygienically protected from surface contact. All parts are dishwasher safe.

Pen Screwdriver 13-in-1

Practical and handy – the bit set made of anodized aluminium includes 6 flat bits and 6 cross head bits in various sizes, including precision mechanics. The bits are securely stored inside the pen. The magnetic bits are particularly easy to handle. Simply place the bit at the tip of the pen, and the screwdriver is ready to use. All bits are made of robust S2 steel. The pen shape facilitates the use as a tool, and the grooved surface ensures a good grip. The clip provides the necessary hold on clothing, a toolbox, or a clipboard. With a fine laser engraving, the bit set becomes an attractive promotional item.
